

ENERGIE 21

Magazine about renewable and secondary energy sources

A bimonthly Energy 21 (Alternative energy) magazine provides theoretical and practical information about production and effective utilization of energy from renewable and secondary sources – biomass, sun, earth, wind, water, waste, etc. The current topics are energy distribution, energy self-sufficiency, security and sustainable development of regions. The magazine is targeted at investors, energy plant operators, construction and technological contractors on the one hand and end users on the other – companies, institutions, sole traders, farmers and property owners. The magazine is regularly read by staff working for public administration, municipal services, research and education, as well as by secondary school and university students.

Issue	Topic	Deadline	Distribution	Notes
1. – February	Effective energy management	22. 1. 2020	17. 2.	
2. – April	Biogas stations	18. 3.	14. 4.
